TNB taps European firm Elia's expertise on RE, energy transition

KUALA LUMPUR: Tenaga Nasional Bhd (TNB) has signed a memorandum of understanding (MoU) with Elia Group SA/NV to share best practices and industry insights to facilitate its renewable energy (RE) and energy transition efforts.

Elia is one of the largest transmission system operators in Europe.

It operates in Belgium and Germany, serving around 30 million customers.

It has more than 19,000km of high voltage lines in the two countries with more than 45,000 megawatts of installed capacity in RE.

TNB said in a statement this was its second collaboration with Elia.

President and chief executive officer Datuk Baharin Din said TNB was looking forward to tapping Elia's expertise.

"There is a lot that Elia can share with TNB, especially in a successful energy transition in the area of RE."

The MoU encompasses five key areas of operational excellence, future trends for utilities, regulatory framework, system operations new bearing and business ventures.

Both parties will also exchange technical information through annual reports and surveys, solutions to problems, technical visits, study trips and training programmes.

"We believe all these will be of significant benefit to both TNB and Elia," said Baharin.
